Our story

« gleemzy is a group of friends who want to share their vision of the world, tell stories, & give an ecological purpose to their numerous projects »

[Estelle from Gleemzy]

Passionate friends

Who hasn't felt that irresistible urge, when moving into a new place, to create every piece of furniture and every element of decoration, with no constraints, letting imagination be the only tool to shape one's home? That's Gleemzy's dream: finally being able to inhabit a space crafted with our own hands, a space that tells a story with every glance, bearing powerful and essential messages.

The journey and music as a starting point...

gleemzy is Estelle, Jean-Louis, Sofiane and Axel. Four friends for whom travels, music, visual art, and any other form of art constitute an endless source of inspiration! The memories collected from each of our journeys are catalyzed, and our creations burst forth! Let's rock your space with gleemzy!

Let's rock your space with Gleemzy!

gleemzy is also about a zest for life that we convey in our living spaces. We create furniture to foster connections! Our strength lies in not holding back, not settling for the beaten paths of conventional decor. We embark on bold projects, guided by our common passion for artistic expression. Each piece of furniture we create is an invitation to discovery and exploration.

The gleemzy adventure

We consider each of our customers and maintain no distance from them because Gleemzy remains one big family!

Our values

« Being eco-friendly and responsible is not an option. Ecology must be an integral part of our thinking, from our designs to their production. »

[Jean-Louis from Gleemzy]

Our Responsible Manufacturing

Our priority since the launch of Gleemzy has always been responsible manufacturing: from the choice of our raw materials to our collaborators, Gleemzy aims to be transparent, conscious, and impeccable!

Ecology at the heart of our concerns

Our raw materials are sustainable and sourced from responsible forests, just like our designs, which are streamlined to avoid depleting an excess of resources.

Craftswomen and craftsmen!

From caning to weaving and woodworking, we only collaborate with artisans, whom we proudly acknowledge in both feminine and masculine forms! Manual

labor and craftsmanship are dear to Gleemzy above all else!

A Team That Listens to Itself

We emphasize the harmony within our internal teams. Each profile is a source of great ideas that only need to be heard. We facilitate moments of discussion and sharing and do not hierarchize our positions. Our small team is our strength!

Design for Everyone

Our creations are always designed to blend seamlessly with any decor. Our furniture is not reserved for any particular elite or hotel - everyone is free to compose their space with our creations!

Be coooool !

Above all, let's stay cool!
Be part of the GleemFam!

Efraktion Collection

« With Efraktion,
we wanted to
make a strong
impact on people's
imagination.
We wanted to
awaken dreamy
landscapes. »

Le retour du cannage

Avec des allées et venues dans le temps, le cannage refait surface dans nos intérieurs. Ambassadrice de cette matière, Stéphanie Percevault restaure et conçoit du mobilier et des luminaires design.

A la fois artiste et artisanne, Stéphanie Percevault remet au goût du jour un savoir-faire traditionnel: le cannage. Cette matière naturelle, élégante et raffinée revient en vogue dans les magazines de décoration. Le mobilier d'une autre époque retrouve une seconde jeunesse grâce au talent de Stéphanie. Elle restaure des chaises, des fauteuils en suivant des gestes précis qui lui ont été transmis par sa mère, et qu'elle a su personnaliser au fil de rencontres avec d'autres artisans, ainsi elle participe à la conservation du patrimoine.

Restauratrice mais aussi créatrice, c'est dans son atelier que Stéphanie donne vie à des pièces originales de luminaires. Cette modernité dans son approche lui apporte la reconnaissance de designers et de décorateurs, faisant naître des collaborations modernes et intemporelles. Elle vient de collaborer avec Gleemzy Studio, une plateforme marchande de produits made in France, sur le fauteuil Boom'rang, qui sera disponible début 2023.

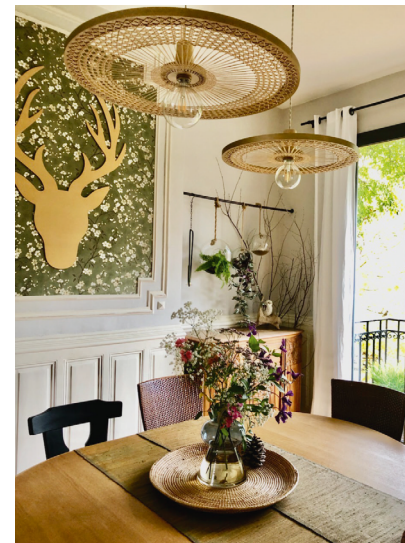

Un retour par touche

Cette méthode de tissage remonte au XVII^{ème} siècle, à l'arrivée du rotin en Europe. Les ébénistes français ont très vite su travailler les fines lanières de ce matériau pour en faire des chaises, des banquettes ou encore des canapés. Après avoir inondé les intérieurs des maisons bourgeoises, le cannage a disparu pour réapparaître durant la Belle Époque. La chaise cannée devient populaire et vient meubler les bistrotts. Les années 80 marqueront une nouvelle étape pour ce procédé : celui de l'industrialisation. En 2023, la technique retrouve ses couleurs. L'envie de produits naturels et de techniques artisanales sont propices à son retour. En dossier ou par simple touche, le cannage s'invite dans tous les intérieurs. Entre nostalgie et modernité, cette matière apporte une certaine douceur et un art de vivre. Stéphanie Percevault participe à son déploiement. L'artisanne est régulièrement sollicitée pour participer à des projets d'aménagement d'intérieur. Tout en cannage évidemment.
